DIVISION II · EXPERT CONSULTATION

Turn operational friction into an executable plan.

Strategic diagnostics and advisory grounded in the way your business works.

A structured diagnostic connects organizational design, workflows, financial drivers, technology and revenue operations. The engagement is designed to move from evidence to priorities, then to an actionable plan supported by optional embedded advisory.

Diagnostic specializations

360°
Organization-wide perspective

Seven areas for focused diagnosis

The consultation practice covers the operating decisions that most directly influence performance, resilience and scalable growth.

Financial & Unit Economics Strategy

Model cash flow, review pricing structures and identify opportunities to improve unit margins.

Operational & Process Diagnostics

Find workflow bottlenecks, redundant tools and inconsistent processes; prioritize practical improvements.

Market Expansion & Regional GTM

Assess target segments, go-to-market channels and regional expansion opportunities.

Organizational Structure & Team Scaling

Clarify accountability, scalable team structures and leadership transitions.

Digital Transformation & Tech Stack Audit

Review software spend, system overlap and opportunities for connected workflows.

Sales Pipeline & Revenue Operations

Improve sales stages, conversion practices, pipeline visibility and forecasting.

Supply Chain & Vendor Cost Optimization

Review vendor terms, procurement, fulfillment and cost-to-serve.

The diagnostic is tailored to the organization and the questions leadership needs answered.

From diagnostic to sustained execution

A focused review creates a practical roadmap, while optional advisory helps leaders navigate implementation as the business evolves.

01

Discovery & data review

Agree the questions, gather available information and understand current operating conditions.

02

Diagnostic assessment

Review workflows, organization, tools and financial or performance drivers.

03

Executive roadmap

Prioritize actions, outline dependencies and connect recommendations to expected business impact.

04

Embedded advisory

Optionally retain senior guidance for recurring reviews and implementation support for up to six months.

Operating principles

- Published diagnostic commitment: delivery within 21 business days.
- Actionable recommendations with ownership and sequencing.
- Optional role-based SOPs to support consistent delegation.
- Optional six-month advisory with recurring execution reviews.

Clear priorities first. Supported implementation next.
